
Christoph Herborn Assumes CEO Role at HCD HealthCare & Diagnostics GmbH

Christoph Herborn embarks on a new chapter in healthcare leadership, taking the helm as CEO at HCD HealthCare & Diagnostics GmbH. With a rich history in medical administration and innovation, Prof Herborn brings extensive experience to his new role. His journey spans from directorial positions in renowned clinics to pivotal roles in healthcare organisations, fostering advancements in diagnostics, treatment, and healthcare systems.

Previously, Prof Herborn served as CEO at Bergman Clinics Germany, contributing significantly to enhancing healthcare delivery. His tenure at Asklepios Kliniken, where he held a vital medical director role for the entire group, showcased his commitment to elevating healthcare standards.

His illustrious career includes influential positions such as Director of MR Future Concepts International at GE Healthcare, contributing to cutting-edge advancements in medical imaging. Prof Herborn's expertise was honed through an esteemed background in radiology at prestigious institutions like the University Clinic Essen and the University Clinic Hamburg-Eppendorf (UKE). His leadership expanded beyond medical practice, encompassing administrative and commercial affairs, marked by notable milestones like overseeing new facility launches and spearheading specialised cancer treatment centres.

Now, at HCD HealthCare & Diagnostics GmbH, Prof Herborn's vision remains steadfast. His focus on leveraging networks and digital solutions to augment healthcare delivery reaffirms his commitment to advancing patient care and transforming healthcare systems. As Prof Herborn steps into this pivotal role, his dedication to innovation and excellence in healthcare sets a promising course for the future of HCD HealthCare & Diagnostics GmbH.
