Designed for Simplicity and Safety – the World's First Ventilation Cockpit™

www.hamilton-medical.com/new

The novel Ventilation Cockpit announced by HAMILTON MEDICAL is designed to reduce complexity and to promote safer ventilation. It is unique to the new HAMILTON-G5 intelligent ventilator to be introduced during the ISICEM in Brussels (27-30, March).

The Ventilation Cockpit presents data in an unprecedented combination. The goal is to improve situational awareness at the patient's bedside and to permit faster patient assessment, resulting in fewer complications and better outcomes, fewer errors, and reduced costs.
