
Meet Agfa HealthCare Enterprise Imaging Experts at HIMSS21

Agfa HealthCare's Enterprise Imaging experts will be available at HIMSS21 from 9-13 August in Las Vegas. They can help you build an Expert Plan to grow your organisations vitality and reduce the complexities of managing medical imaging.

These experts will share proven insight that will guide your health systems to improve both patient and clinical experience while reducing waste and exceeding your growth and budget goals.

□

Agfa HealthCare aims to transform the delivery of care and to support healthcare professionals across the globe with efficient and advanced imaging management systems. The Enterprise Imaging platform from Agfa HealthCare is a robust and united solution that can help clients manage resource allocation, improve workflow and productivity and deliver fast, efficient and patient-centric care. The goal is to improve workflow so that the process of diagnosis and treatment is faster and more efficient. This can allow healthcare providers to improve patient experience and outcomes and allow healthcare professionals to deliver value, standardise workflows and improve collaboration across departments and geographies.
