
Los Angeles Jewish Home, USA

The nonprofit Los Angeles Jewish Home, one of the leading senior healthcare systems in America, uses the DT Research Medical Cart Computer to serve over 6,000 seniors every year. LA Jewish Home also serves more than 5,000 people through in-your-home and community health programs, and by using the battery powered Medical Cart Computers which can operate fully on swappable batteries and installed onto any VESA compatible cart, they can streamline critical daily functions and be completely mobile without the use of cords or costly cart batteries.
