

A successful and inspiring Inspire2Live Annual congress in Amsterdam

Annual Congress
7-9 February 2018

We look back on a very successful and inspiring Annual congress in Amsterdam in February. A lot of you have participated, received a lot and given even more. That's what life asks from us.

We've collected the powerpoint presentations of the speakers and recorded all the talks. Together with the program and the minutes of the working sessions you find them in this [link](#).

We are already working on our next Annual and of course on other congresses and discovery networks as well, for we surely believe that in connecting patients, researchers, clinicians, government, industry and health insurance companies we will find the way and solutions in getting cancer under control and take care of a good quality of life. Our common goal.

Several initiatives have already been taken and we get reactions almost every day that because of the cooperation at our congress between the stakeholders in healthcare more actions are already been set up. This is what it's all about: 'Doing instead of only listening and discussing'.

Let us finish with a kind and proud making statement of one of our participants in the hope that you will join us next year in an even better congress with even more impact.

I was delighted to join I2L this month, a meeting which I found exceptionally extraordinary. However do you come up with these ingenious ideas and have their implementation go this smoothly? Its because it emanates from the heart and is a sentiment shared by all. The speakers and groups that you brought together and the level of interaction was phenomenal. Networking was ideal and I am sure everyone went home with huge ideas that will be acted upon. I surely have a few and will get back to you with those.
(Ghada Ibrahim, Switzerland).
