

## Affidea Lithuania Expands with SYNLAB Acquisition, Adding Advanced Lab Services to Its Network

**Affidea, a leading pan-European provider of polyclinics, advanced diagnostic imaging, and specialist healthcare services, has expanded its presence in Lithuania by acquiring SYNLAB Lithuania, a prominent laboratory network, in a 100% acquisition. This move completes Affidea's offering in Lithuania by adding advanced laboratory analysis to its portfolio of outpatient services.**

With this milestone, Affidea Lithuania will now be able to offer integrated outpatient services, including a full range of diagnostic and laboratory services, as well as specialist consultations, to patients, prescribers, public hospitals, business customers and insurance clients throughout Lithuania.

*"Our commitment to current and future patients remains unchanged, and services will continue to be delivered as they always have"* , says Vitalijus Orlovas, General Manager of Affidea Lithuania. He also emphasises that the acquisition of SYNLAB Lithuania will enable Affidea to offer full scope of services for patients' diagnosis and treatment.

*"The acquisition of SYNLAB is a significant milestone in our strategic expansion in Lithuania. By integrating SYNLAB's specialized laboratory services with our existing outpatient network, we can deliver a full spectrum of services, from advanced diagnostics to specialised laboratory tests, close to the communities we serve. We are proud to continue providing the highest standards of care to our patients and look forward to welcoming the SYNLAB team to the Affidea extensive network",* said Vitalijus Orlovas.

Guy Blomfield, Affidea Group CEO and Chairman of the Management Board, commented: *"The acquisition of SYNLAB Lithuania is an important step in our expansion plan in Lithuania where we built a network of community-based polyclinics, offering integrated healthcare services. This decision to add laboratories to our business reinforces our commitment to delivering accessible, high-quality services that meet the evolving needs of the communities we serve. We are excited to welcome the SYNLAB team to the Affidea network as we continue to develop our service proposition".*

SYNLAB Lithuania operates one central and one regional laboratory as well as nine blood collection points (BCPs) across Lithuania, serving approximately 94,000 patients annually. The laboratories are strategically located in the five largest cities—Vilnius, Klaipėda, Kaunas, Šiauliai, and Druskininkai—where Affidea already has an established presence with state-of-the-art centres where it offers a full range of outpatient, day surgery and rehabilitation services.

Affidea was advised by Wallcess on the legal matters of this transaction, the advisors' team was led by Dovile Burgiene.

In Lithuania, Affidea operates 17 healthcare centres, working with up to 1,300 professionals, 600 of which are doctors, serving over 600,000 patients annually.
