

Calgary Scientific Inc. Hires Dave Galiotto to Head Global Finance and Operations

Calgary Scientific Inc., a company known for creating innovative technology for the medical industry and beyond, has announced that Dave Galiotto has been named Chief Financial Officer and Executive Vice President, Operations. Dave is also a member of Calgary Scientific's Office-of-the-President, a four member team of senior executives responsible for collaboratively making strategic corporate and operational decisions, as well as reporting to the Board of Directors.

Dave joins Calgary Scientific from Seagate subsidiary EVault, where he managed global sales operations activities. He began his career at KPMG and has spent 25 years working in senior roles in a variety of software and technology companies including early stage startups, large global entities and private companies. Dave has been involved in every aspect of growing successful technology companies, including implementing accounting and control systems; public reporting and investor relations; financing and capital-raising; and Merger & Acquisition activities.

"With the addition of Dave Galiotto, we have rounded out our senior Executive team with a proven leader, one with a rare combination of industry experience, a significant background as Senior Financial Officer in both private and public companies, and additional strength in worldwide sales operations," said Byron Osing, Executive Chair of Calgary Scientific. "Dave will join us operating out of our office in Seattle, Washington, strengthening our senior presence in the U.S. market. We look forward to having Dave's guiding hand assisting us with our plans for rapid growth in the coming years."

"Few opportunities come along with the combination of truly game changing technology, great people and solid financial backing," said Dave Galiotto, Chief Financial Officer and Executive Vice President of Operations at Calgary Scientific. "I'm very excited to join the executive team at this pivotal time for the company. I'm here to help Calgary Scientific evolve to the next stage and am looking forward to working with the highly skilled team already in place."
