
CARS Congress Announces Special Events

After 25 years of CARS Congresses and peer-reviewed publications, the field is expanding with many new and promising developments in radiology and surgery. What is possible now in imaging based diagnosis and therapy and what are the next major methods and technologies are presented by outstanding speakers at Computer Assisted Radiology and Surgery (CARS) 2010 in Geneva. A carefully selected spectrum of special sessions and key presentations make CARS 2010 a unique congress for displaying how the practice of medicine is impacted by modern information and communication technology.
