
CIRSE Congress 2011: Record Number of Abstracts Received

The Cardiovascular and Interventional Radiology Society of Europe (CIRSE), invites you to take part in the largest and most comprehensive forum for minimally invasive image-guided therapy, which will take place in Munich from September 10 - 14, 2011.

The congress will offer attendees over 200 hours of key scientific content in seven of the most important areas in interventional radiology:

1. 1. Imaging
2. 2. Vascular Interventions
3. 3. Transcatheter Embolisation
4. 4. Interventional Oncology
5. 5. Neuro Interventions
6. 6. Non-Vascular Interventions
7. 7. IR Management

Attendees at CIRSE 2011 will learn about cutting-edge research, discover new advances, and witness exclusive product launches. The innovative sessions, workshops and symposia at the congress will be run by leading figures in the field, who will offer valuable insights into interesting topics such as:

- - Image guidance and assessment of tumour therapy
- - The diabetic foot
- - Introduction to acute stroke management
- - Ongoing research in IR
- - High-intensity focused ultrasound (HIFU)
- - New frontiers in oncologic IR
- - Percutaneous treatment of chronic back pain
- - Imaging after Endovascular Aneurysm Repair (EVAR)
- - Is Chronic Cerebrospinal Venous Insufficiency (CCSVI) a real entity?
- - CIRSE Meets Germany, Australia and New Zealand (a session introducing the IR societies)

Join us in Munich, one of Europe's most charming cities, where a rich past meets an inspirational present.

CIRSE 2011...

- Over 5,600 participants expected
- Record number of abstracts already received
- Over 5,000 m2 technical exhibition area
