

Cytrellis® Biosystems Announces Shiv Sabesan, PhD as Chief Technology Officer

Cytrellis® Biosystems, a pioneer in novel medical aesthetic solutions, announces the appointment of Dr. Shiv Sabesan as Chief Technology Officer (CTO). In his new role, Shiv will lead the company's innovation and technology strategy as it continues to advance its proprietary ellacor® Micro-Coring® Technology and expand indications.

"We are excited to have Shiv Sabesan join Cytrellis' executive leadership team. He brings over 20 years of HealthTech and medical device experience, as well as a proven track record of success," shared Jason Richey, President and CEO of Cytrellis Biosystems. "I am excited about the innovative perspective he brings and how his passion and expertise aligns with our vision of shaping the future of aesthetic possibilities."

"I am honored to be joining the Cytrellis team at an opportune time, as ellacor with Micro-Coring Technology continues to transform the aesthetic industry," said Shiv. "As CTO, I look forward to working with this talented team to drive our novel, disruptive technology forward and build a multi-faceted digital ecosystem to optimize ellacor patient outcomes."

Prior to Cytrellis, Shiv served as a Principal at Mulai, a technology and strategic consulting company focused on providing design development and strategic services in the area of HealthTech, SaaS, AI and medical devices.

In addition to Mulai, Shiv held global roles in Research and Development and Product Management at multiple health technology companies including Philips Healthcare, Google, Medtronic and LivaNova, as well as innovative startups such as Alto Neuroscience and Movella.

Dr. Sabesan holds his PhD in electrical engineering from Arizona State University and has successfully launched over ten FDA/CE regulated medical devices and software, along with market specific healthcare products for the APAC and Latin American regions.
