

## Delfi Promotes Jenn Buechel to President and Chief Operating Officer

---

Delfi Diagnostics, Inc., a pioneering developer of a new class of high-performance, accessible liquid biopsy tests for early cancer detection and monitoring, announces the promotion of Jenn Buechel to the new role of President & Chief Operating Officer.

"Jenn joined Delfi in our very early days, and has been a critical member of our executive team at every stage," said Victor Velculescu, MD, PhD, Delfi's Co-Founder and Chief Executive Officer. "Her dedication to building accessible products, and to creating and leading strong teams is unparalleled. We are delighted to have her step into this expanded leadership role, where she will oversee all our internal product development and operations activities."

"I'm proud to be part of this team that continues to expand the DELFI platform to deliver quality screening and diagnostic products," said Buechel. "We have an incredible opportunity to lower barriers to access high performing tests, not just in the US, but globally, and I'm honored to play a leadership role in this work."

An early leader in the liquid biopsy field, Jenn has held executive leadership roles at Guardant Health and GRAIL before joining Delfi. In addition to her industry work, Jenn is active in non-profit leadership, and is a Health Innovators Fellow with The Aspen Institute. She earned a Master's in Systems Engineering and an MBA from Stanford University, and a Bachelors in Chemical Engineering (Applied Science) from Queen's University in Canada.
