

## **DERUNGS Medical Lighting Bright sights at Medica 2008, D**

---

Derungs Licht AG strives to initiate a fundamentally different approach to light. The target is to meet the fast changes in the medical field and the high, individual needs in matters of professional lighting. With our long experience in engineering and design we work goal-orientated with the light as a variable component to adapt it ideal to your daily needs in working life. We focus our attention not only on global light solutions and mutable light but also on best quality of the light for your requirements.

In the area of LED technology Derungs Licht started in the field of examination and gynaecology in a new epoch. We present you our new developments for medicals and clinics. As professional support assistance we show you an examination light with highest identity for a multitude of consultations. Assure yourself on place and catch a look at our innovations and discover the inimitable features which will relieve your daily working grind.

Experience Light in realistic settings on our booth A16 in hall 13 at the Medica 2008, D
