

Dr Francois Lebel Sirnaomics New Senior Vice President for Preclinical & Clinical Development

Sirnaomics Ltd., a leading biopharmaceutical company in discovery and development of RNAi therapeutics announced that Dr. Francois Lebel, M.D., an experienced biopharmaceutical industry executive, has been appointed as Senior Vice President for preclinical and clinical development of the Group.

“With multiple drug candidates moving into clinical studies, including two clinical trials advancing to late-stage development, Sirnaomics is embarking on a journey to push its innovative drug candidates past the finish line, which requires a seasoned leader with a successful track record,” said Dr. Patrick Lu, Founder, Chairman of the Board, Executive Director, President and Chief Executive Officer of Sirnaomics. “With Dr. Lebel’s in-depth knowledge and experience in novel drug product marketing approvals, Dr. Lebel’s addition to Sirnaomics’ senior leadership will greatly enhance our capability to advance its therapeutic candidates through the late-stage product development.

Dr. Lebel is a strategic leader with broad drug development experience including immunooncology and nucleic acid therapeutics. Throughout his 30-year biopharma career at companies such as GSK, Pfizer, Baxter Healthcare, MedImmune, and Chiron Corporation, Dr. Lebel has designed and managed international research and development programs to successfully achieve multiple product marketing approvals. His recent senior leadership roles include Executive Vice President for Research & Development and Chief Medical Officer at Spectrum Pharmaceuticals (a Nasdaq listed company; stock code: SPPI), where he was responsible for preclinical and clinical development, regulatory affairs and pharmacovigilance/drug safety, and successfully secured a novel drug marketing authorization at the U.S. Food and Drug Administration (FDA) in 2022. After joining Sirnaomics as Senior Vice President for preclinical and clinical development, Dr. Lebel will take a leading role in the Group’s late-stage product development of the innovative RNAi drug candidates.

Dr. Lebel indicates, “I am delighted to join the Sirnaomics team at this pivotal time for STP705 with the recent positive data in skin cancer and the Group’s evolving diversified pipeline. I look forward to working closely with the U.S. FDA and investigators to efficiently generate the required data to support a marketing application.”
