
Dr Simon Jackson Joins Professor Kevin Prise to Form New *BJR* Editor-in-Chief Team

We are delighted to announce that Dr Simon Jackson has been appointed as the incoming Editor-in-Chief (Medical) for *BJR*. He joins Professor Kevin Prise, Editor-in-Chief (Scientific) to further facilitate the development of the journal as a key resource for the radiological scientific community.

Dr Jackson has accrued his editorial experience for *BJR* acting as a Senior Editor since 2010 after completing a number of years as an Associate Editor and reviewer. He has worked for the past 18 years as a consultant radiologist at Derriford Hospital in Plymouth, specialising in both diagnostic and interventional gastrointestinal radiology including endoscopy. His research interests are focused on multimodality imaging applications in GI oncology and he lectures widely on aspects of hepatopancreaticobiliary and GI tract radiology.

Professor Prise is based at Queen's University Belfast, in the Centre for Cancer Research & Cell Biology within the School of Medicine, Dentistry and Biomedical Sciences, working on translational radiobiology research. His has varied research interests covering radiation risk, the application of novel radiation modalities, advanced radiotherapy models and drug radiation combinations.

Sophia Anderton, BIR Head of Publishing said "we are delighted to have Simon and Kevin at the helm of *BJR* and look forward to continuing developing the journal for authors and readers alike."

We would also like to thank the outgoing *BJR* Editor-in-Chief (Medical) Dr Nigel Hoggard for his dedication and guidance to the journal during his tenure, and wish him every success in his future endeavours.

BJR is published by the British Institute of Radiology and contains peer reviewed research in all areas of radiology, oncology and medical physics.
