
Drive Clinical Confidence with Enterprise Imaging

Enterprise Imaging is a breakthrough technology that allows radiology departments to be in control of costs and personnel and to transform delivery of care by providing clinicals access to a patient-centric imaging information system designed to boost collaboration and diagnostic accuracy.

The ultimate goal of Enterprise Imaging is to improve clinical productivity and deliver fast access to patient clinical imaging data across multiple sites and domains. It is an effective tool to enhance workflow and collaboration between colleagues and peers. With these benefits, Enterprise Imaging supports informed decision making and treatment planning.

Enterprise Imaging provides the tools you need to foster confidence and satisfaction among your employees. It also helps you streamline your day-to-day operations and create a continuous quality improvement and learning environment.

Enterprise Imaging can help you keep your staff happy, create a high-quality learning environment and help clinicians make better-informed decisions. It offers:

- A **rules-based workflow** engine that allows an automatic flow of tasks to you and your staff in real-time. Everyone can stay on top of tasks, and both time and effort can be organised in the most effective and efficient manner.
- **At-a-glance dashboards** which provide a quick and clear overview of the day-to-day operations and helps everyone be aware of the status of events and the tasks that are scheduled, in-progress, or waiting for completion.
- A learning environment that can help your department **become a learning facility** and enable you to share insights and feedback among peers and use quality control tools for continuous improvement of your key processes.

Enterprise Imaging is a breakthrough technology that allows radiology departments to be in control of costs and personnel and to transform delivery of care by providing clinicals access to a patient-centric imaging information system designed to boost collaboration and diagnostic accuracy.

Overall, Enterprise Imaging can help:

- Streamline workflow with rules-based workflow engagement, fast, easy and personalised reporting, and a real-time view of operations and performance through the Live Dashboard.
- Intelligent, confident reporting with a consistent and predictable workflow supported by advanced clinical and measurement tools.
- Peer-to-peer learning through report analysis and discussion and an overall improvement in diagnostic accuracy.
- Real-time exchange of information and collaboration through easy-to-use tools and sharing functions.
- Quality control through efficient and detailed workflow analysis to ensure the delivery of high-quality and efficient patient care.

Enterprise Imaging is thus a sophisticated system for radiology departments. It can improve productivity, responsiveness, job satisfaction of your staff and quality of care for patients. It allows clinicians to look beyond EHR and to utilise advanced tools that can improve both delivery of care and clinical practice.
