

ESICM LIVES 2011 in Berlin - EIT-lunch Session Invitation!

The exciting field of Electrical Impedance Tomography (EIT) is progressing rapidly. With PulmoVista 500 Dräger has developed the first clinical device that can be used quickly and effectively in clinical routine.

During the ESICM 2011 in Berlin, October 1–5, Dräger will be holding a lunch session

›**Functional lung monitoring and its future**‹.

The session will take place on

Monday Oct. 3rd, 12:30 to 14:00 in Hall 14.2., Room Oslo.

Lunch bags will be provided for all participants.

Programme:

Clinical experts will give you an idea how to integrate EIT into clinical practice, followed by a round table discussion.

Chairs:

- Prof. Antonio Pesenti (University Milano-Bicocca, Italy)
- Prof. Christian Putensen (University Hospital Bonn, Germany)

Speakers:

- Prof. Christian Putensen (University Hospital Bonn, Germany)
“Electric Impedance Tomography – clinical reality and vision”
- Prof. Hermann Wrigge (University Hospital Leipzig, Germany)
“Monitoring of regional ventilation – just nice pictures or heavy data”
- Dr. Diederik Gommers (Erasmus Medical Centre Rotterdam, Netherlands)

“Using EIT as a guide to optimize PEEP levels in mechanically ventilated patients”

– Dr. Helena Odenstedt (Sahlgrenska University Hospital Gothenburg, Sweden)

“Optimising ventilatory settings using EIT”

We hope you are able to participate in this event.

Visit Dräger at the ESICM 2011 in Berlin, October 1-5, Hall 12, Booth No. 16.
