

European Society for Hybrid Medical Imaging Launched

The European Society of Radiology (ESR) has announced the launch of a new subspecialty society, the European Society for Hybrid Medical Imaging (ESHI). The new society will be officially inaugurated at the European Congress of Radiology (ECR) in March 2016. Membership is open to both radiologists and nuclear medicine physicians.

ESHI has been created with the aim of improving training in hybrid imaging so that its practitioners can make the best use of PET/CT and PET/MR for the benefit of patients.

“We hope that this new society will help to stimulate a much closer collaborative relationship between radiology and nuclear medicine, and will provide a framework for the future development of training, education and standards in hybrid imaging. It is very important that this unique field is represented by its own European body,” stated ESR President, [Prof. Luis Donoso Bach](#), from Barcelona, Spain.

The use of PET/CT and PET/MR is steadily increasing, leading to a growing need for knowledge and skills among the imaging community. In 2011, the multimodality imaging training curriculum, written by the ESR and the European Association of Nuclear Medicine (EANM), was published in the journal *Insights into Imaging*. This curriculum sets out an appropriate knowledge base in multimodality imaging to help practitioners provide the highest quality of patient care.

In November 2014, a session about hybrid imaging training was held during the Annual Leadership Meeting of the ESR's European member societies. A vast majority of the attendees supported the idea of establishing a European society for hybrid imaging. In addition, radiology residents have shown a strong wish to increase their training in nuclear medicine, as revealed by a survey conducted by the ESR among all its members-in-training in early 2015.

The ESHI Board consists of the following members:

Katrine Riklund, Umeå/SE – President

Osman Ratib, Geneva/CH

Thomas Beyer, Vienna/AT

Gerald Antoch, Düsseldorf/DE

Andrea Laghi, Rome/IT

Ex officio: President of the European Society of Molecular and Functional Imaging in Radiology (ESMOFIR) –

Olivier Clément, Paris/FR
