

EUSOBI Annual Scientific Meeting 2023

EUSOBI Annual Scientific Meeting 2023 is scheduled to take place in the captivating city of Valencia, Spain, from September 28 to 30, 2023. In keeping with tradition, the event will be preceded by the EUSOBI Training Course and an EYC Workshop.

For this year's gathering, EUSOBI will collaborate with the Spanish Society of Breast Imaging (SEDIM), involving active participation from Spanish professionals.

To provide the full EUSOBI experience, it is hoped that they will achieve robust in-person attendance, blending scientific and social interactions, whilst also planning to live broadcast the main programme for those unable to join the event in Valencia.

The forthcoming Valencia meeting in 2023 promises to be a noteworthy event, with the following key highlights:

- Updates of the BI-RADS lexicon
- Sessions on Screening, Staging and B3 lesions
- Hot topics in breast oncology
- Staying happy as a breast radiologist
- Advanced imaging techniques to characterize breast lesions
- Artificial Intelligence
- a MDT session on unusual cases and missed opportunities

For this year's event, a distinguished keynote speaker will be introduced: Dr. Javier Cortes, hailing from Spain. Dr. Cortes will enlighten the audience with his insights into the future of oncology, providing a comprehensive overview of this evolving field.

In EUSOBI'S continuous endeavor to strengthen global collaborations, they will be meeting with breast radiologists from Colombia this year. This exchange will further foster international relationships and facilitate the exchange of knowledge and expertise.
