

FDA Clearance for OR Technology's dicomPACS®DX-R

OR Technology gets FDA OK for the combination of dicomPACS®DX-R with different digital X-ray detectors.

OR Technology have announced that they have received the clearance letter from the FDA for the combination of OR Technology dicomPACS®DX-R acquisition and diagnostic software with different digital radiography (DR) detectors: Perkin Elmer XRpad 4336, Thales Pixium 3543 EZ and Thales Pixium 2430 EZ for X-ray images in the human medicine.

These product combinations can now be legally sold to the medical market in the US. dicomPACS®DX-R acquisition and diagnostic software is the software for the complete integration of X-ray generators, flat panels, CR systems, image processing, image management, patient administration and PACS in one application.
