

Germany

The state of Hesse adjusted the Hessian Hospital Laws to enable PPP projects in healthcare. By realising this as a PPP project, considerable cost advantages can be achieved. The PPP approach includes the selection of a private sector party that will design and construct the buildings and operate these for 25 years. ARCADIS will coordinate the process up to construction completion and will also provide services for an additional 6 to 12 months after the beginning of the hospital's operations.

Also Hochtaunus hospital will be the first 'green building' hospital in Germany. Construction of the hospital will be certified as a green building pilot project by DGNB (German Association for Sustainable Building).
