

Healthcare's Moment of Truth

In healthcare today, change is everywhere.

An aging population, an increasingly knowledgeable consumer, a growing sophistication in technology...not to mention a wave of legislation and fiscal restraint that is redefining how facilities are delivered, operated and maintained. Every point of the cycle demands singular expertise, and every point is a moment of truth—for operators, investors, clinicians, consumers.

At ARCADIS, we know the only constant is change, especially when it comes to an industry as complex and as challenging as healthcare and healthcare technologies. That's why our mission is to direct a new trajectory for today's healthcare model, from the earliest stages of strategy through design, construction and operations.

Along with our architecture subsidiary RTKL, we are a truly global partnership committed to enriching lives and designing sustainable solutions to the complex issues of our time. With our combined strengths, ARCADIS and RTKL provide an integrated range of services across the full building cycle—from strategic facilities planning, project management and cost consultancy, design, engineering and medical equipment planning to ongoing facilities management.

Throughout Europe, the U.K. and the Middle East we offer proven local professionals who understand what works where and why. It's a global perspective tempered with cultural sensitivity and economic pragmatism, because our strength lies in listening to our client's vision and translating that vision into a reality.

We think it's an approach that adds value as much as it enriches lives.
