

## **Hitachi's 128-Slice CT System Cleared for U.S.**

---

Hitachi Medical Systems has announced FDA clearance for its SCENARIO Advanced 128 CT system.

SCENARIO combines the latest dose saving technologies with enhanced patient access features and rapid workflow in a 128-slice model. The Advanced 128 features are also available as a field upgrade for the SCENARIO 64-slice model.

“SCENARIO is another example of Hitachi’s ability to provide superior product value by combining the latest dose saving and imaging technologies with a premium feature set that includes a standard 2 metre scannable range table with greater than 500 lb. weight capacity and unique lateral shift capability (16cm range) to centre the patient’s anatomy of interest nearest to the scan iso-center”, said Mark Silverman, Director of CT Marketing.
