

Hologic Symposium: High Volume Screening

SYMPOSIUM

»» High Volume screening with
Hologic 3D Mammography™

Moderator of Session: Prof. emer Per Skaane

Friday, March 4
14.00 - 15.00
Austria Center
Hall C

Several locations have started high volume screening with Hologic 3D Mammography™ in Europe. A large scale adoption is ongoing in the USA with some locations past their third screening round with Hologic 3D Mammography. Results from the use of this technology in screening are concordant and very positive around an increase in invasive cancer detection and a reduction in recall rates.

Practical advices regarding Hologic 3D Mammography™ implementation are discussed in many forums and so are the impact on screening assessment. Leaders using Hologic 3D Mammography™ in screening will share their experiences from implementation and give their view on further positive evolutions in the future.

Friday, March 4th 14.00 - 15.00 Austria Center - Hall C

Moderator of Session:

Prof. emer Per Skaane
