Sponsored by Zebra Medical Vision, the **one-stop AI showcase** will be located in a dedicated 40, 000 sq. foot space featuring AI products and solutions, mini vendor presentations and a deep learning classroom for radiologists engaging with AI.

“High interest by commercial companies and meeting attendees led to [this exciting development](#),” said John Jaworski, CEM, Director: Meetings and Exhibition Services of RSNA. “The AI Theatre, Deep Learning Classroom and Hands-on Classroom will provide various educational opportunities on artificial intelligence within the Showcase.”

More than **100 AI showcase companies are participating**, representing a 25% increase over 2018’s figures.

The expanded AI presence will also include a Hands-on Classroom for vendors to demonstrate their products to delegates practically. Additionally, RSNA will host a demonstration of emerging data technologies and the data standards that enable them showing how [AI and other decision support tools can be incorporated in the radiology workflow](#).

Delegates will have the opportunity to recharge and network in specially designated areas throughout the showcase area.
