- What: Intelrad UK events, featuring product demos and customer testimonials
- When: April 23, 24, 25, 28
- Where: Leeds, Newcastle, Manchester, London
- Info: www.intelrad.co.uk/tour

Intelrad Medical Systems™, a leader in medical imaging PACS, RIS and workflow solutions, has announced the expansion of their UK operations, which includes the opening of an office in Manchester with dedicated staff to better serve existing customers and expand the availability of their solutions in the region.

As part of their UK market entry, Intelrad will host four events across the country to demonstrate the value that their award-winning IntelePACS solution provides to both imaging centres and hospitals. Taking place in Leeds, Newcastle, Manchester and London, each event will be attended by Intelrad Founder and CTO Chris Henri, UK & Ireland Sales Manager Roy Kinnear, and Hospital Solutions Manager Jon Robinson, who will provide in-depth demonstrations of IntelePACS as well as other Intelrad solutions. In addition, the events in Leeds, Newcastle and London will include testimonials from UK-based Intelrad customers.

“IntelePACS provides a high value alternative to the market, one that is proven to increase productivity, enhance collaboration between physicians, and facilitate access to and exchange of medical records,” said Henri. “By expanding our UK presence, we look forward to addressing the challenges faced by private and public radiology organisations, including NHS Hospitals and Trusts, and assisting them in the deployment of next-generation solutions.”

Designed to facilitate integration and support large-scale implementations, IntelePACS is built to provide users with a high-quality experience from any location – ideal for multi-site organisations and remote reporting. Backed by industry-leading services and support, IntelePACS comprises a suite of sophisticated modules that includes Image Fusion, Breast Imaging and Multi-Method Reporting, which blends traditional dictation, voice recognition and structured reporting in a seamless streamlined interface and workflow. A rich set of third-party product integrations further enhances the offering.

Intelrad’s series of UK events will start in Leeds on April 23, followed by Newcastle on April 24, Manchester on April 25, and London on April 28.
