

Landmark Agreement Signed for Delivering Breakthrough Medical Solutions

United Imaging Healthcare, a leading manufacturer of state-of-the-art digital PET/CT systems headquartered in Shanghai, and the Medical Imaging Electronics (MiE) company renowned for over forty years of expertise in molecular imaging, have signed a landmark cooperation agreement.

The partnership will create a unique synergy that will deliver breakthrough medical solutions for large-scale diagnostic equipment. Both companies are highly specialised and share a commitment to deliver the highest standards of quality, technological innovation and customer service. These values form the basis for a long-term collaboration in order to meet the growing demand for advanced PET/CT systems.

“We are delighted to be working with United Imaging Healthcare,” says Managing Partner of MiE Thomas Kühl. “The digital PET/CT systems perfectly complement our existing product portfolio and open new opportunities to offer innovative solutions to our customers. We look forward to combining United Imaging’s technological expertise with our world-class service to this end. Our shared vision of providing state-of-the-art medical technology will make this collaboration a great success.”

United Imaging Healthcare is recognised in the industry for its superior technology and accurate, reliable PET/CT systems. Its products are used in renowned medical institutions around the world and have helped to improve the diagnosis and treatment of many patients. By working with MiE, United Imaging Healthcare will increase the reach of its products, which will benefit even more patients.

Medical Imaging Electronics has been bringing experience and expertise to the field of nuclear medicine products and services since 1981. The German company has earned an outstanding reputation for its exceptional service, and is known for supporting its customers with tailor-made solutions.

With their extensive experience and expertise, both companies are well positioned to lead the marketing and sales of state-of-the-art PET/CT systems, making them available to a wider international clientele.
