Top Quote from Blog: Reinventing breast tomosynthesis.

"As a woman who participates in breast cancer screening and is passionate about ensuring women have access to the best technology available, I know first-hand how important it is to develop equipment that factors in insights from both radiologists and patients to improve the experience. These insight-driven advancements in technology must be supported by strong clinical evidence, and I look forward to continuing the work on the next innovations that aim to do just that."
