M*Modal Announces New CEO

Scott MacKenzie, a veteran of the healthcare IT industry has joined M*Modal as their Chief Executive Officer. He will also be a member of M*Modal's Board of Directors.

M*Modal is a leading provider of clinical documentation and Speech Understanding Solutions. The company is focused on increasing the productivity of healthcare providers by providing them a combination of technology and services geared towards improving clinical documentation and patient focus. The company augments EHR investments by improving the accuracy and expediency of input as well as the fluency of collaborative information exchange.

Jeffrey Goldberg, the Chair of the Board at M*Modal made the announcement today. "Scott brings more than 25 years of experience in healthcare and information technology, with a successful track record in driving operational execution and helping companies leverage their core assets to create growth and value. M*Modal continues to be at the forefront of clinical documentation and technology-enabled services, and we are confident that Scott's leadership will help strengthen the company for long-term success."

MacKenzie has previously served as the President of RelayHealth Pharmacy Solutions and as the CEO of Passport Health Communications. When Passport Health was purchased by Experian Health, a leading healthcare revenue cycle solutions provider, MacKenzie served as the President of Experian. He has also held executive positions at Cerner Corporation.

MacKenzie is very enthusiastic about his new appointment. "I am joining M*Modal at a time when the company is positioned for change and the market is open to solutions that improve productivity and leverage technology investments. I look forward to working with M*Modal's talented team to deliver on its vision to be the industry's best clinical documentation provider."

M*Modal is also one of the largest clinical transcription service providers in the US and has a global network of medical editors committed to this task. It provides advanced cloud-based Speech Understanding technology and data analytics enabling physicians and clinicians to include the context of their patient narratives into electronic health records in a single step. This not only enhances their productivity but also improves the efficiency and the quality of patient care.
