Matrox AuroraVX Boards to be Sold with NECDS-J Medical Displays

Matrox Graphics Inc., a manufacturer of graphics solutions, has announced that NECDS-J will offer the Matrox AuroraVX Series™ display controller board with its medical MD21GS-3MP, MD21GS-2MP displays in Japan. The AuroraVX Series of display controller boards maximise display output options, powering up to three displays from a single low-profile PCI Express board. The AuroraVX3mp supports a Navigation Console (NC) up to a resolution of 2 MP, along with two Twin Imaging Displays (TIDs) of 2 MP or 3 MP each.
