

Medison ACCUVIX XQ Prestige 07 Newly Launched

Debuted at the ISUOG 2006, ACCUVIX XQ Prestige 07 attracted interest from attendees due to its Spatial Compound Imaging (SCI), which enhances 2D image quality, 3D Compound Imaging (3D CI), which improves image quality of the C-plane that has been the demerit of the current ultrasound diagnostic systems and 3D Auto-Contour, which allows for faster 3D imaging. In addition, ACCUVIX XQ Prestige 07 has various advanced probe functionalities, such as 129,024 channels, Clip Cine Store and easy-to-handle User Interface..
