
MovingLife Launches a Public Consultation on Roadmaps for mHealth Solutions

The aim of the online public stakeholder consultation on “Roadmaps for the widespread use and broad acceptance of mHealth solutions” is to collect evidence on the most important needs and requirements that must be satisfied in order to facilitate the deployment of mHealth solutions.

MovingLife EU funded project is seeking advice, comments and input on stakeholders' specific areas of interest and expertise to address the requirements and challenges of the components that characterise the gaps that need to be filled in the roadmap. The consultation process will run until 17 September 2012 and the results from the consultation will be used to revise and fine-tune the preliminary roadmaps into a consolidated roadmap for mHealth. This final roadmap and an action plan for its incorporation will be presented and discussed at a large stakeholder conference in Brussels in the beginning of 2013.
