

Neurolif Appoints Experienced Finance Executive as Chief Financial Officer

Neurolif, a medical neurotechnology innovator, announces the appointment of Anthony Borowicz as Chief Financial Officer.

"I'm very pleased to have Tony joining Neurolif," said Scott Drees, Neurolif CEO. "His extensive financial acumen and manufacturing operations experience coupled with his wealth of corporate development expertise will be invaluable as we embark on our next phase of growth. Tony has spent his entire career in the medical device industry and has a demonstrated history of creating shareholder value and is adept at translating strategy into tangible actions and financial plans".

Mr. Borowicz has had a successful career in the medical device industry, serving executive leadership roles in strategy, finance, mergers & acquisitions and investor relations. Most recently he served as SVP of Strategy, Corporate Development and Investor Relations at Integer Holdings, a leading medical device outsource manufacturer serving the neuromodulation, cardiovascular and cardiac markets. Previously he served as the Company's Vice President of Finance, Treasurer and Director of Investor Relations. Prior to Integer, Anthony served as Vice President of Finance for a division of Kendall Healthcare and as Vice President and CFO for Graphic Controls. He holds a Masters in Finance and a Bachelor of Business Administration from Niagara University.

"I'm very excited to have Tony join the Neurolif leadership team", said Amit Dar, Neurolif Founder & Chief Technology Officer. "His profile with solid financial and operational knowledge, coupled with his acuity for developing and executing strategic plans will be a great asset to the company. His previous experience on serving on the boards of various medical device startups and accessing capital markets will serve us well in our commercial growth".

"I'm excited to becoming part of the highly motivated leadership team at Neurolif," stated Tony. "The company is at an exciting inflection point with the launch of the Relivion® MG in the US. The device is a non-drug, wearable neuromodulation therapy that will address the large unmet need of millions of patients suffering from chronic neurological and neuropsychiatric disorders. I am very much looking forward to developing the company further in delivering the best possible care to patients worldwide and creating a valuation premium for associates and shareholders".
