

Radiometer Becomes a Gold Sponsor of the European Congress on Emergency Medicine

RADIOMETER  Proud to be gold sponsor of EuSEM 2016.

Radiometer is proud to be a gold sponsor of this year's European Congress on Emergency Medicine organized by the European Society for Emergency Medicine (EuSEM) in Vienna, Austria, October 1-5. Visitors to **Booth 52** in the Hofburg Galerie will have the opportunity to see live demonstrations of Radiometer's point-of-care (POC) testing solutions; the [AQT90 FLEX analyzer](#), [ABL90 FLEX PLUS analyzer](#) and [the HemoCue® WBC DIFF System](#). Radiometer will also be hosting a lunchtime symposium – *POWER UP YOUR ED: 3 ways to implement change for faster diagnostic decisions* – on Tuesday October 4, featuring three keynote speakers delivering presentations on sepsis management, elderly patients and lean processes for point-of-care testing in the emergency department (ED).

Radiometer is committed to helping ED clinicians make crucial decisions as quickly as possible, offering a range of POC testing solutions that provide immediate access to fast, reliable results. This enables earlier diagnosis and initiation of treatment, helping to save more lives. Lab-quality quantitative results for a wide range of critical parameters – including troponin, NT-proBNP, D-dimer, CRP, PCT – as well as rapid analysis of blood gases and lactate plus accurate white blood cell counts, are delivered at the point of patient care in minutes.

Henrik Schimmell, President of Radiometer, commented: "We are delighted to be sponsoring this year's EuSEM Congress with an impressive scientific program covering a range of important topics in the field of emergency medicine. We look forward to demonstrating our point-of-care testing solutions and welcoming delegates to the lunchtime symposium."
