
RSNA 2019: Winners of the 3rd RADxx Awards

[RAD Women \(RADxx\)](#), a networking and mentorship group for women in radiology, informatics and IT management of radiology systems, announced the winners of the 3rd annual [RADxx Awards](#).

The RADxx Awards is a recognition of women's achievements in the field of medical imaging informatics. It also acknowledges anyone – both men and women – who have supported the career advancement of women in this field. The selection of winners was done by the RADxx executive committee from qualified submissions.

The award ceremony took place at the annual [RSNA](#) conference, on December 4, during a cocktail reception sponsored by [Ambra Health](#). Over 365 guests attended the event where winners and honourable mentions of the RADxx Awards were unveiled as follows:

RADxx Trailblazer: Charlene Tomaselli, Director of Medical Imaging Information Technology at Johns Hopkins Medicine. Her team implements and supports all the radiology applications in five hospitals and four freestanding imaging centres.

RADxx Advocate: Dr Anant Madabhushi, Director of the Center for Computational Imaging and Personalized Diagnostics (CCIPD); F. Alex Nason Professor II, Department of Biomedical Engineering; and on faculty in the Departments of Pathology, Radiology, Radiation Oncology, Urology, General Medical Sciences, and Electrical Engineering and Computer Science at Case Western Reserve University.

RADxx Champion: Dr Agnieszka Solberg, Interventional Radiologist and Clinical Assistant Professor at UND. She is a creator of a group for over 3,000 women radiologists, which provides them with valuable resources to navigate their male-dominant field.

Rising Star: Dr Michelle Bardis, a former NASA electrical engineer at the Jet Propulsion Laboratory, she is using her mathematical and programming skills to analyse a new type of data – medical images.

"The level of talent among this year's RADxx nominations was truly inspiring. The RADxx movement is helping to make our profession more diverse and inclusive," said Dr Geraldine McGinty, who co-founded RADxx in 2016.

RADxx is an initiative aimed to foster networking and mentorship opportunities for women leaders in radiology, informatics, and IT management of imaging systems. It is supported by Ambra Health and is led by a steering committee of prominent physicians and thought leaders.
