### Torbjörn Kronander, President and CEO of Sectra AB, comments

“Sectra continues to experience major variations between quarters, particularly in terms of order bookings. During the second quarter, we reported increased order bookings in both Imaging IT Solutions and Secure Communications. We signed agreements with several new US customers, and won a prestigious order in the Netherlands for a nationwide breast screening solution. Our greatest growth opportunities currently lie in the US market, where we have a high level of customer satisfaction but a relatively small market share to date.

“Several of our new orders will initially be charged to earnings. A significant portion of our costs arise in the early stages of the multiyear projects, while revenue and profit recognition are distributed over the entire duration of the customer contract. We are also investing in the countries where we have established new offices, Canada and France, which entails higher initial costs but ultimately will contribute to our continued growth and earnings.

“Healthcare and cybersecurity are growing and rapidly changing markets, where numerous opportunities are being created for companies such as Sectra. We are well positioned in these areas, with stable solutions, a long-term future focus and high customer satisfaction. I am therefore optimistic when it comes to our ability to continue this positive trend going forward. Our financial goals remain firm: an equity/assets ratio of 30%, an operating margin of 15%, and 50% growth in operating earnings per share over a five-year period. However, I would like to point out that growth comes at a price. Our aim is to continue growing in the long term, but we will not be able to simultaneously increase our margins beyond our goal.”
