
Sectra signs new enterprise-wide PACS contract with academic health system

International medical imaging IT and cybersecurity company [Sectra](#) will install its enterprise imaging PACS throughout Stanford Health Care (SHC) and Lucile Packard Children's Hospital to support clinical and research imaging needs of the organization. The Sectra solution – integrated with Epic Radiant – will ensure business continuity, high system availability, and scalability for future growth.

In addition to Sectra PACS for all diagnostic radiology, the multi-year agreement will include advanced visualization tools, teaching file software, Sectra Breast Imaging PACS for mammography workflow, 2D and 3D orthopaedic templating tools, business analytics and a universal viewer. Stanford Health Care is part of Stanford Medicine, an academic health system that includes the Stanford University School of Medicine, Stanford Health Care, and Stanford Children's Health, with Lucile Packard Children's Hospital.

"On behalf of the 700 employees at Sectra, we are delighted to work with a prestigious institution such as Stanford Health Care. We look forward to exceeding their expectations and collaborating on future research endeavors," says Mikael Anden, President of Sectra, Inc.

Sectra PACS is optimized for high production environments and designed to shorten report turnaround times, enhance result distribution workflows, and improve communication between radiology and referring departments. For five continuous years in the US, Sectra PACS has won the customer satisfaction award 'Best in KLAS' for large hospitals.
