

Siemens Healthineers Shape 21 HIMSS Experience

This year at [HIMSS21- August 9-13, Las Vegas, NV, Siemens Healthineers](#) will showcase its latest digital healthcare innovations designed to support better decision-making. The Siemens Healthineers Shape 21 HIMSS Experience will allow visitors to explore the latest innovations in interactive offerings and join live events and conversations with experts.

Siemens Healthineers is dedicated to supporting healthcare organisations and clinicians to make better decisions along the patient pathway. This requires integrating large amounts of data from disparate sources and leveraging them to facilitate improved analysis and effective decisions in diagnosis, treatment, and follow-up.

This year, at HIMSS21, Siemens Healthineers will demonstrate a comprehensive collection of platforms and solutions - from a vendor-neutral, secure digital health platform to diagnostic and therapeutic companions that can turn data into insights to remote care management solutions that connect patients with care teams.

Some of the key solutions featured this year in Las Vegas will include the various digital health platforms and companions offered by Siemens Healthineers including its:

- AI-Powered Companions
- Diagnostic Companions
- Therapeutic Companions
- Remote Care Management Solutions

Siemens Healthineers offers a broad range of products utilising Artificial Intelligence and facilitating Clinical Decision Support, Population Health Management and Precision Health. Its tools and solutions are designed to optimise health information management and interoperability, and integration.
