

## **Sony Launch UP-DF75 FilmStation at MEDICA**

---

The UP-DF75 imager offers a variety of film formats with two online media trays, capable of covering any choice of film media type to cover all radiography applications. The print quality fulfils the stringent mammography requirements in terms of optical density and resolution. Furthermore the UP-DF75 features edge-to-edge printing and up to 20 user/application specific gamma curves for generating optimized and dedicated image reproduction for each application.
