Start your Unique Virtual Journey with Mindray at ECR2020

The ECR 2020 Virtual is in full swing from July 15-21. During this critical moment, Mindray aims to provide you with a comprehensive solution which guarantees more precise diagnosis and treatment for better patient care.

With deep insights into unmet clinical needs, Mindray offers a unique virtual tour with multiple intelligent applications to help address your clinical challenges throughout the whole care continuum.

□

How CLEAR can you see a liver?

□

During diagnostic procedure, quick detection and evaluation will contribute greatly to improving clinician's confidence on disease diagnosis and early intervention.

Applying Mindray's exclusive Ultra-wide Beam Tracking technology, Sound Touch Elastography, clinicians are able to evaluate tissue stiffness easily with comprehensive quantitative elastic analysis, thus enhancing their diagnostic confidence.

How to use ONLY one ultrasound for fusion?

Nowadays, fusion imaging is widely acknowledged in ultrasound clinical practice as it combines the advantages of CT/MRI and the real time ultrasound together to improve the accuracy of pathology diagnosis as well as ultrasound guided intervention.

However, this time, Mindray is ready to amaze you with our 3D US-US fusion imaging which can be applied without CT/MRI and guarantee precise and simple fusion imaging during interventional procedure.

Care with less stethoscope, more Ultrasound?

□

As a non-invasive, rapid, safe and accurate examination method, ultrasound plays an increasing role to monitor patient status under different clinical environment.

With dedicated solutions yet agile mobility, portable ultrasound can adapt to multiple environment easily with no compromise in imaging performance, helping clinicians to address diagnostic challenges and make rapid decision in nowadays fast-paced, overburdened and demanding hospital environments.

Meet the Expert

□

How to access to numerous advanced scientific programs just at home?

Along with the journey, a series of insightful educational sessions are provided every day at Mindray's virtual booth, where a line-up of leading radiology experts has come together to share their expertise and latest findings in the field of vascular imaging, CEUS, elastography, fusion imaging and so on.

It also serves as a well-established platform for you to communicate the up-to-date ideas and technologies with key opinion leaders by simply one click.

Demo Center

□

Still wondering how to scan properly with ultrasound under different situations?

Be sure to stop by our exclusive Demo Center, which displays more than 15 short demos to present the key scanning skills across all applications.

□

Now, don't hesitate to start your unique virtual journey with Mindray at ECR2020 to share our latest innovations!
