UBC Appoints Nathan Thompson Chief Information Officer

Effective January 2, 2023, Nathan Thompson will assume the role of Chief Information Officer of UBC

UBC, a biopharmaceutical leader providing integrated clinical, safety, and commercialization services, announced today that Nathan Thompson has joined UBC and, effective January 2, 2023, will assume the role of Chief Information Officer.

Nathan joins UBC most recently from Premier Research, where he served as their Chief Information Officer and Head of Corporate Real Estate, and brings more than 20 years of complex technology, operational, and corporate strategy to UBC. With experience spanning the hospital administration and life sciences industries, he will support UBC's vision with a strategic approach to product design through technology innovations.

"As we consider the next level of growth for UBC, we recognize the importance of innovative and differentiated technology solutions as well as technology to drive real world evidence generation," said Patrick Lindsay, President & Chief Executive Officer, UBC. "To ensure UBC's long-term strategic growth, we must have industry-leading products, streamlined IT processes, and effective operational controls in place. I believe that with Nathan's addition to the already outstanding leadership team, we strengthen our evidence-driven model and will continue to be a leader in data-driven decisions and outcomes for the life sciences industry."
