

## USCAP Appoints David M. Berman, MD, PhD as the new Editor-in-Chief of Laboratory Investigation

---

The United States and Canadian Academy of Pathology is pleased to announce the appointment of David M. Berman, MD, PhD of Queen's University School of Medicine as the new Editor-in-Chief of its scientific journal, *Laboratory Investigation*. Dr. Berman will take over as head of the journal on January 1, 2023, replacing Gene P. Siegal, MD, PhD, who spent fifteen years as Editor-in-Chief, and increased *Laboratory Investigation's* submission rate and impact factor to their highest levels in the journal's history.

"We are so grateful for all that Dr. Siegal has done for *Laboratory Investigation*," said USCAP's Executive Vice President Patrick Flaherty. "He has worked tirelessly to uphold the journal's high standards while keeping it current with the evolving fields of pathology and scientific publishing. His work with *LJ* will have a lasting impact on the field of investigative pathology."

Incoming editor David M. Berman, MD PhD is a practicing pathologist and avid research scientist who plans to highlight research that advances pathology as a discipline. The refreshed editorial team and an enhanced social media operation will highlight rigorous research that clarifies mechanisms of disease and enhances their classification.

"Over the past 15 years, Dr. Siegal and his team have made *Laboratory Investigation* into a leading pathobiology journal with stimulating and timely content and a reputation for efficient, high-quality review," said Dr. Berman. "Building on this momentum as Editor-in-Chief, I will position *Laboratory Investigation* as the go-to resource for those who want to see how advances in science and technology are impacting pathology."
