Promoting Management and Leadership

Welcome to Arab Health 2021: Let's reconnect

Join Arab Health 2021 Online... The show isn't over yet

Arab Health 2021 opened its virtual doors May 23 and the virtual platform will remain open until July 22nd, 2021, so healthcare professionals can have an extended opportunity to discover the latest innovations and connect with industry experts.

The post-pandemic live event took place at the Dubai World Trade Centre from 21-24 June. Arab Health began 46 years ago to provide a platform for the world's leading equipment manufacturers, wholesalers and distributors to come together with the medical and scientific community in the Middle East.

"Our show theme is 'United by Business', which is indicative of the pent-up demand within the industry to get back to some form of normality and start doing business once again," said Wouter Molman, Executive Vice President for Informa Markets, organiser of the event.

Thousands of international healthcare companies and over 51,000 attendees from 170 countries attended the four-day event in-person and online. Arab Health offered participants nine CME accredited medical courses and three health conferences on innovation and technology.

Organisers have created the virtual platform so that participants can still connect with exhibitors online, gain access to leadership content and build a strong network! **Access the online Arab Health 2021 platform [here](#).**
