

## Younes Ammari Joins Moment\* as Medical Prompt Engineer Intern

---

[Younes Ammari](#) has taken on a new position as a Medical Prompt Engineer Intern at moment\*, a pioneering digital health company founded by Miguel Johns and one of the creators of Milton AI.

Moment\* is known for its innovative use of AI technology to revolutionise diabetes management, and Younes's new role will see him contributing to the development of AI-driven solutions that enhance healthcare accessibility and effectiveness. He is excited to apply his medical background and passion for digital health to this impactful work.

Ammari expressed his gratitude for the opportunity to learn from Miguel Johns and Moment's experienced team, as well as his anticipation for the rewarding journey ahead. With his clinical informatics experience and diverse technical skills, he is well-positioned to contribute to cutting-edge advancements in healthcare technology.

Younes Ammari's move marks an exciting development for the moment and its ongoing mission to reshape the future of healthcare.
